## Unaudited Interim Results

For the six months ended 30 June 2013

## Unaudited Interim Results For the six months ended 30 June 2013

### Chairman's Statement

#### Financial Highlights

- Group profit before tax up 10% to US\$10 million, from US\$9.2 million for the same period last year.
- Group profit after tax increased by 20% to US\$8.3 million from US\$6.9 million for the corresponding period last year.
- Basic earnings per share increased to 1.31 US Cents from 1.06 US Cents.
- Cost to income ratio improved to 73% from 75%.
- Total shareholders' equity increased by 31% to US\$88 million from US\$67 million as at 31 December 2012.
- Total assets increased by 15% to US\$451 million from US\$392 million as at 31 December 2012.
- Net asset value per share 13.10 US Cents (2012 – 12.5 US Cents).

#### Financial Performance Review

Despite the harsh economic environment, the Group sustained a positive performance, achieving a profit before tax of US\$10 million for the six months ended 30 June 2013. This was driven by increased revenues from the financial services businesses as well as cost containment. The commendable performance is 10% better than the US\$9.2 million achieved for the same period last year and is 59% of the 2012 full year financial performance of US\$16.9 million. The Group's earnings capacity continues to be buttressed by its diversified business model, with all the subsidiaries except the manufacturing business, achieving results significantly higher than those achieved for the corresponding period last year.

The Group's total income recorded an increase of US\$0.1 million to US\$36.8 million from US\$36.7 million. The increase was weighed down by the mandatory reduction of bank charges and interest margins as stipulated in the Memorandum of Understanding ("MoU") signed between the banking industry and the Reserve Bank of Zimbabwe. In addition, the subdued performance of the manufacturing business also weighed down revenues.

The Group's total income is expected to increase in the second half of the year as contributions from increased volumes and the recently introduced concrete tile product become more pronounced.

Net interest income registered a modest growth of 5% to US\$9.9 million contributing 27% of the Group's total income in line with the same period last year. The unavailability of adequate credit lines for the country continues to push the cost of funding, as financial institutions compete to attract the limited deposits. This has had a negative impact on margins against a backdrop of a mandatory interest rate capping.

Despite the capping of bank charges to customers, fee and commission income increased by 2% to US\$11.5 million as a result of increased volume of transactions.

The contribution of gross profit on sales to total income decreased to 17% from 20% in percentage terms and to US\$6.3 million from US\$7.4 million in value as the Group's manufacturing business offered discounts to customers to improve stock turnover in order to manage working capital. The manufacturing business gross profit margins are set to improve following the commissioning of the new tile manufacturing plant in July 2013.

The Group's gross insurance premium increased by 12% to US\$12.1 million, in line with increased business. The net earned insurance premium, however decreased by 6% to US\$7.2 million, as the insurance businesses reviewed their risk transfer model by retaining less premium in order to improve the quality of cover to customers. The contribution of net earned insurance premium to Group total income, at 20%, was comparable to the corresponding period last year.

The total impairment charge at US\$10.2 million is considered adequate in view of the security being held by the banking subsidiaries.

The Group's cost to income ratio improved to 73% from 75% compared to the corresponding period last year as a result of improved cost containment. The operating expenses registered an increase of 2.8% to US\$21.7 million compared to the same period last year.

The Group's statement of financial position at US\$451 million increased by 15% compared to 31 December 2012. The increase in the statement of financial position was mainly buoyed by the 16% increase in deposits to US\$295 million compared to 31 December 2012, as the FBC brand continued to gain traction in the market.

Total equity attributable to shareholders of the parent company increased by 31% compared to the position as at 31 December 2012 mainly as a result of the disposal of treasury shares at a profit of US\$2.6 million and the acquisition of 40% of FBC Building Society from NSSA at a profit of US\$ 2.6 million.

#### Operating Environment

The economy, though improving, continues to be dogged by liquidity challenges, infrastructural inadequacies, high external debt, limited revenue growth, as well as a widening trade and current account deficit, due to depressed exports and over-dependence on imports. Industrial capacity utilization decreased from 57% in 2011 to 40% in 2012, and continues to decrease as evidenced by continuous closure and downsizing of firms. This is due to constraints which include limited access to medium to long term funding and prohibitive borrowing costs.

Gross Domestic Product growth forecasts were revised downwards to 3.4%, from initial projections of 5% for the year 2013 indicating yet another year of moderate growth.

#### Financial Services Sector

The slow growth in the deposit base against a more than proportionate increase in funding requirements continues to incapacitate the sector from adequately meeting the economy's funding needs. Total deposits increased by 5.3% from US\$4.2 billion in January 2013 to US\$4.4 billion in May 2013, while total banking sector loans and advances increased by 5.56% from US\$3.4 billion to US\$3.59 billion. Revenues in the sector were subdued as a result of the Memorandum of Understanding signed in February this year which affected the performance of non-funded income. Capitalization was a major highlight over the period in the sector with 12 institutions, including FBC, having been reported to have fully complied with the December 2012 capital threshold as at 31 March 2013.

#### New Capital Requirements

The Reserve Bank of Zimbabwe increased the minimum capital requirements for banking institutions in July 2012. Commercial banks and building societies are required to raise their minimum capital from US\$12.5 million and US\$10 million to US\$100 million and US\$80 million respectively, by 30 June 2014. Banking institutions must comply with 50% of the prescribed minimum capital by 30 June 2013; 75% by 31 December 2013 and 100% by 30 June 2014.

In order for the banking subsidiaries to comply with the new capital requirements, FBC Holdings Limited ("FBCH") has received approval for its proposal to merge the Bank and the Building Society into a single entity, FBC Bank Limited. The merger would result in the two institutions bringing their capital together and this, coupled with

other initiatives, would enable the emergence of a commercial bank that is in compliance with the minimum capital requirements.

In pursuance of the merger transaction, a corporate restructuring was carried out by FBC Holdings Limited which resulted in the National Social Security Authority's ("NSSA") 40% shareholding in FBC Building Society being transferred to FBCH through a share swap, resulting in an increase of NSSA's shareholding in FBCH to 35%. The execution of this restructuring transaction resulted in both the Bank and the Society being owned 100% by FBCH.

Whilst all the hurdles have been cleared, the Bank and the Society are still operating as separate legal entities as we await a formal announcement from the Central Bank with regard to the capitalization timeline. In the event that the capitalization deadline remains the same, the Bank and the Building Society will be merged into one entity to comply with the capital requirements. If the banking subsidiaries' current capital levels are in compliance with the new dispensation, the units will continue to operate separately. The total capital of the Bank and the Society as at 30 June 2013 was US\$60 million, which is in excess of the US\$50 million threshold as at that date.

As at 30 June 2013, all the other FBC Holdings Limited subsidiaries were in full compliance with regulatory capital requirements.

#### Share Price Performance

The demand by foreign investors on the Zimbabwe Stock Exchange ("ZSE"), buoyed the main industrial index to a 39% growth at 211.19 points as at the end of June 2013 and the resource counters put up a moderate performance at 73.29 points, up 12.5% on a year to date basis. The FBC Holdings Limited's share price also attracted foreign demand, with three foreign shareholders purchasing a total of over 10% of its listed shares. The FBCH share price gained 25.2%, closing the half year at US\$0.10. The FBCH share price continued to trade below the net asset value per share which at half year was at US\$0.13. We believe the FBCH stock significantly remains undervalued especially given the strong earning capacity of the Group.

#### Corporate Social Investment

The Group has disbursed over US\$140 000 towards various corporate social responsibility initiatives in the fields of education, health, sports and the arts during the first half of the year and remains committed to giving back to the communities it operates in.

#### Dividend

On behalf of the Board, I am pleased to advise shareholders that an interim dividend of 0.149 US Cents per share is proposed after taking into account the good performance of the Group and the solid recapitalization plan. The dividend being proposed translates to seven times dividend cover.

#### Marketing and Public Relations

The Group has remained highly visible within the market place during the first half of the year owing to various sustained marketing and public relations initiatives that have been implemented. FBC Holdings Limited was publicly recognized once again when it scooped the Independent Quoted Companies Survey 2012 Banking Sector Award for the second year running, having received the same accolade in 2011. The Group has also previously won the Independent Quoted Companies Overall Award for the best performing company.

#### e-Commerce

The Group will continue to champion the financial inclusion agenda through products and services that cater for more segments of the market. We have initiated the rolling out of solutions targeting sectors that were previously not served and implementing innovative services which continue to make banking more convenient and efficient. Leveraging on technology to streamline internal processes and developing more products, will allow us to be proactive in an increasingly competitive market. Electronic platforms have also enabled us to capture the diaspora markets through innovative products and services which provide around the clock access to our services from anywhere across the globe.

The increased number of transactions generated through e-channels has allowed the Bank to counter the significantly adverse impact of the Memorandum of Understanding on risk-free income in the first half of the year. The Group will continue to expand into new markets in the second half through integration of the secondary distribution network, which should give even greater service reach.

#### Outlook

Following the just-ended peaceful elections, it is our hope that this will now pave the way for macro-economic stability and increased foreign direct investment, leading to improved liquidity. The Group remains well poised to exploit the new environment to grow shareholder value.

#### Appreciation

As always, I am humbled by the unwavering support and confidence shown in the FBC brand by our valued customers. I am truly appreciative of the non-executive directors' guidance and counsel during this period. The professionalism, dedication and commitment demonstrated at all times, by the Group Chief Executive, his management team and staff, is highly commendable.

**Herbert Nkala**  
Group Chairman  
21 August 2013

### Notes to the Financial Results For the six months ended 30 June 2013

#### 1 GENERAL INFORMATION

FBC Holdings Limited ("the Company") and its subsidiaries (together "the Group") provide a wide range of commercial banking, mortgage finance, stockbroking, reinsurance, insurance and other related financial services. The Group also manufactures pipes and roofing sheets.

The Company is a limited liability company, which is listed on the Zimbabwe Stock Exchange and is incorporated and domiciled in Zimbabwe together with its subsidiaries. These condensed interim consolidated financial statements were approved for issue by the Board of Directors on 21 August 2013.

#### 2 BASIS OF PREPARATION

The Group's condensed interim consolidated financial statements for the half year ended 30 June 2013 have been prepared in accordance with the International Accounting Standard ("IAS") 34, the Zimbabwe Companies Act (Chapter 24:03) and the Zimbabwe Banking Act (Chapter 24:20) and should be read in conjunction with the consolidated financial statements for the year ended 31 December 2012.

#### 3 ACCOUNTING POLICIES

The accounting policies applied in the preparation of these interim consolidated financial statements are consistent with those of the annual consolidated financial statements for the year ended 31 December 2012.

The condensed interim consolidated financial statements have been prepared under the historical cost convention and are presented in the United States dollars ("US\$") and are rounded to the nearest dollar.

#### 26.4 Diluted headline earnings per share

Diluted headline earnings per share is calculated after adjusting the weighted average number of ordinary shares outstanding to assume conversion of all dilutive potential ordinary shares. The Company does not have dilutive ordinary shares.

	Unaudited 30 June 2013 US\$	Unaudited 30 June 2012 US\$
Headline earnings	7 022 137	5 637 188
Weighted average number of ordinary shares at 30 June	535 301 929	537 014 361
Diluted earnings per share (US cents)	1.31	1.06

#### 27 FAIR VALUE OF FINANCIAL ASSETS AND LIABILITIES

##### 27.1 FINANCIAL INSTRUMENTS NOT MEASURED AT FAIR VALUE

The fair values of all financial assets and liabilities presented on the Group's consolidated statement of financial position approximate the financial instruments' carrying amounts due to the short-term tenor of the financial instruments.

##### 27.2 CLASSIFICATION OF FINANCIAL INSTRUMENTS AT FAIR VALUE

The table below sets out the Group's classification of each class of financial assets and liabilities, and their fair values.

	Held for trading US\$	Loans and receivables US\$	Financial liabilities at amortised cost US\$
<b>As at 30 June 2013</b>			
<b>Trading assets</b>			
Balances with other banks and cash	-	119 136 714	-
Loans and advances to customers	-	210 606 591	-
Trade and other receivables including insurance receivables	-	28 229 337	-
Financial assets at fair value through profit or loss	2 546 372	-	-
	<b>2 546 372</b>	<b>357 972 642</b>	<b>-</b>
<b>Trading liabilities</b>			
Deposits and borrowings from other banks and customers	-	-	295 388 184
Insurance liabilities	-	-	11 580 535
Trade and other payables	-	-	33 503 889
	<b>-</b>	<b>-</b>	<b>340 472 608</b>

##### 27.3 FAIR VALUE HIERARCHY

Fair value measurements using:

	Quoted prices in active markets for identical assets (Level 1) US\$	Significant other observable inputs (Level 2) US\$	Significant unobservable inputs (Level 3) US\$
<b>Recurring fair value measurements</b>			
<b>As at 30 June 2013</b>			
Investment property – Residential house, Victoria Falls	-	25 000	-
Financial assets at fair value through profit or loss	2 546 372	-	-
<b>As at 31 December 2012</b>			
Investment property – Residential house, Victoria Falls	-	25 000	-
Financial assets at fair value through profit or loss	2 932 818	-	-

There were no transfers between levels 1 and 2 during the period

##### Valuation techniques used to derive fair values

Level 1 fair values for equity securities is based on their bid prices on the Zimbabwe Stock Exchange as at 30 June 2013

Level 2 fair values of investment property have been arrived at on the basis of a valuation carried out by an independent professionally qualified valuer as at 31 December 2011.

#### 28 RELATED PARTY TRANSACTIONS

The Group carried out banking and investments related transactions with various companies related to its shareholders, all of which were undertaken in compliance with the relevant banking regulations. The full list of related parties and details of transactions are provided in the Group's annual report for the year ended 31 December 2012. There have not been any material movements since.

## Unaudited Interim Results For the six months ended 30 June 2013

### Notes to the Financial Results (continued) For the six months ended 30 June 2013

#### 29 SEGMENT REPORTING

Segment information is presented in respect of business segments.

Segment revenue, expenses, results and assets are items that are directly attributable to the business segment or which can be allocated on a reasonable basis to a business segment. All transactions between segments are conducted at arms length.

The Group comprises seven business segments i.e. commercial banking, microlending, mortgage financing, short term, reinsurance, insurance, stockbroking and manufacturing.

Performance is measured based on segment profit before income tax, as included in the internal management reports that are reviewed by the Group Executive Committee.

	Commercial banking US\$	Microlending US\$	Mortgage financing US\$	Short term reinsurance US\$	Short term insurance US\$	Stockbroking US\$	Manufacturing US\$	Consolidated US\$

## Unaudited Interim Results For the six months ended 30 June 2013

### Notes to the Financial Results (continued) For the six months ended 30 June 2013

#### 30 RISK MANAGEMENT

##### Overview

The Group continues to maintain a strong risk management culture in response to the changing operating environment in order to achieve an appropriate balance between risk and reward. This approach has enabled the Group to trade within the limits as defined in the risk appetite matrix of the Group. The Group regularly scans the environment and realigns its policies, procedures and strategic thrust in pursuit of organisational objectives. The risk management framework covers the following key risk types:

##### Risk categories

#### 30.1 Strategic risk

Strategic risk is the current and prospective impact on earnings or capital arising from adverse business decisions, improper implementation of decisions, or lack of responsiveness to industry changes. The Board of Directors retains the overall responsibility for strategic risk management through the Board Finance and Strategy Committee.

#### 30.2 Reputational risk

Reputational risk is the potential that negative publicity regarding the Group's business practices, whether true or not, will cause a decline in the customer base, costly litigation, or revenue reductions. This risk may result from the Group's failure to effectively manage any or all of the other risk types. Management translates the reputational risk management strategy established by the Board of Directors into policies, processes and procedures that are implemented throughout the Group.

#### 30.3 Credit risk

Credit risk is the current or prospective risk to earnings and capital arising from a debtor's failure to meet the terms of any contract with the Group or if a debtor otherwise fails to perform as agreed.

##### Credit risk framework and governance

The Group's largest source of credit risk is loans, albeit that credit risk exists throughout the other activities of the Group, on and off the balance sheet. These other activities include inter-bank transactions, mortgage loans, foreign exchange transactions, and guarantees. Given the significant size of the loan portfolio on the balance sheet of the Group, credit risk remains one of the major risks.

To effectively manage credit risk, the Board and Management established an effective and sound credit risk management framework which is supported by a strong risk culture and environment. Credit risk management is governed by each entity's credit policy guidelines and ultimately approved by the Board of Directors.

The Board of Directors is ultimately responsible for credit risk. Group Credit Management Division, is responsible for the implementation of the credit policies, which cover compliance with prescribed sanctioning authority levels, avoidance of a high concentration of credit risk and regular review of credit limits. The Group Risk Management Division, Group Compliance and Group Audit also monitor independently the management of Credit risk.

##### Credit policies, procedures and limits

The Group has sound and well-defined policies, procedures and limits which are reviewed annually and approved by the Board of Directors and strictly implemented by management. Credit risk limits include delegated approval and write-off limits to advances managers, management and board credit committees, counterparty limits, individual account limits, group limits and concentration limits.

##### Credit risk mitigation and hedging

As part of the Group's credit risk mitigation and hedging strategy, various types of collateral is taken by the banking subsidiaries. These include mortgage bonds over residential, commercial and industrial properties, cession of book debts and the underlying moveable assets financed. In addition, a guarantee is often required particularly in support of a credit facility granted to counterparty. Generally, guarantor counterparties include parent companies and shareholders. Creditworthiness for the guarantor is established in line with the credit policy.

##### Credit risk stress testing

The Group and the entities recognise the possible events or future changes that could have a negative impact on the credit portfolios and affect the Group's ability to generate more business. To mitigate this risk, the Group has put mechanisms in place to enhance its stress testing methodologies.

##### Impairments

An allowance for loan impairment is established if there is objective evidence that the Group will not be able to collect all amounts due according to the original contractual terms of loans. The amount of the allowance is the difference between the carrying amount and the recoverable amount, being the present value of expected cash flows, including amounts recoverable from guarantees and collateral, discounted at the original effective interest rate of loans.

##### Credit terms:

##### Default

This is failure by a borrower to comply with the terms and conditions of a loan facility as set out in the facility offer letter or loan contract. Default occurs when a debtor is either unwilling or unable to repay a loan.

##### Past due loans

These are loans whereby the debtor is in default by exceeding the loan tenure or expiry date as expressly set out in the loan contract i.e. the debtor fails to repay the loan by a specific given date.

##### Impaired loans

The Group's policy regards impaired/ doubtful loans as all those loans where the degree of default becomes extensive such that the Group no longer has reasonable assurance of collection of the full outstanding amount of principal and interest. All such loans are classified in the loan grades 8, 9 and 10.

##### Provisioning policy and write offs

Determination of general and specific impairment allowances;

The Group complies with the following Reserve Bank of Zimbabwe provisioning requirements;

##### General allowance for impairment

##### Prime to satisfactory Grades "1 to 3" - No evident weakness, performing to contractual terms

General allowance for impairment for facilities in this category are maintained at 1% of total customer account outstanding balances and off balance sheet (i.e. contingent) risks.

##### Moderate to fair Grades "4 to 5" - Acceptable risk level to acceptable with care

General allowance for impairment for facilities in this category are maintained at 5% of total customer account outstanding balances and off balance sheet (i.e. contingent) risks.

##### Speculative to highly speculative Grades "6 to 7" - Exhibits potential weaknesses, which require management attention to special attention

General allowance for impairment for these facilities are maintained at 10% of total customer account outstanding balances and off balance sheet (i.e. contingent) risks.

##### Specific allowance for impairment

##### Sub-Standard Grade "8" - Timely repayment and/or settlement may be at risk.

Specific allowance for impairment for facilities in this category are currently maintained at 30% of total customer outstanding balances and off balance sheet (i.e. contingent) risks less the value of tangible security held.

##### Doubtful Grade "9" - Full repayment and/or settlement highly improbable

Specific allowance for impairment for exposures in this grade are currently maintained at 50% of total customer outstanding balances and off balance sheet (i.e. contingent) risks after deducting the value of any tangible security held.

##### Loss Grade "10" - Collection not possible

Specific allowance for impairment for debts in this category are currently maintained at 100% of total customer outstanding balances and off balance sheet (i.e. contingent) risks again after deducting the value of any tangible security held.

##### The basis for writing off assets

When an advance which has been identified as impaired and subjected to a specific allowance for impairment, continues to deteriorate, a point will come when it may be concluded that there is no realistic prospect of recovery. Authority will be sought from the subsidiary Board Credit Committee for the exposure to be immediately written off from the bank's books while long term recovery strategies are being pursued.

##### Credit risk and Basel II

The Group has implemented Credit Risk Basel II standards in line with the regulatory authorities' approach. Internal processes have been revamped in an effort to comply with the requirements. Policies and procedure manuals have been realigned to comply with the minimum requirements of Basel II.

#### 30.4 Liquidity risk

Liquidity Risk is the current or prospective risk to earnings and capital arising from the Group's inability to meet its liabilities when they fall due without incurring unacceptable losses.

##### Liquidity risk framework and governance

The Group does not treat Liquidity risk in isolation as it is often triggered by consequences of other financial risks such as credit risk and market risk. The Group's liquidity risk management framework is therefore designed to ensure that its subsidiaries have adequate liquidity to withstand any stressed conditions. To achieve this objective, the Board of Directors through the entities' Board Asset Liability Committees is ultimately responsible for liquidity risk management. The responsibility for managing the daily funding requirements is delegated to the Heads of Treasury Divisions for banking entities and Finance Managers for non-banking entities with independent day to day monitoring being provided by Group Risk Management.

##### Liquidity and funding management

The Group's management of liquidity and funding is decentralised and each entity is required to fully adopt the liquidity policy approved by the Board with independent monitoring being provided by the risk management function. The Group uses concentration risk limits to ensure that funding diversification is maintained across the products, counterparties and sectors. Major sources of funding are in the form of deposits across a spectrum of retail and wholesale clients for all the subsidiaries.

##### Cash flow and maturity profile analysis

The Group uses the cash flow and maturity mismatch analysis on both contractual and behavioural basis to assess their ability to meet immediate liquidity requirements and plan for their medium to long term liquidity profile.

##### Liquidity contingency plans

In line with the Group's liquidity policy, liquidity contingency plans are in place for the subsidiaries in order to ensure a positive outcome in the event of a liquidity crisis. The plans clearly outline early warning indicators which are supported by clear and decisive crisis response strategies. The crisis response strategies are created around the relevant crisis management structures and address both specific and market crises.

##### Liquidity stress testing

It is the Group's policy that each entity conducts stress tests on a regular basis to ensure that they have adequate liquidity to withstand stressed conditions. In this regard, anticipated on- and off-balance sheet cash flows are subjected to a variety of specific and systemic stress scenarios during the period in an effort to evaluate the impact of unlikely events on liquidity positions.

#### 30.5 Market risk

Market risk is the risk of financial loss in on and off-balance sheet trading positions arising from movements in market prices. Market risk exists whenever the Group has taken trading, banking or investment positions.

##### Market risk from trading positions.

The Group uses a collection of risk measurement methodologies to assess market risk, including value-at-risk (VaR), stress testing, loss triggers and traditional risk management measures.

##### Market risk from banking positions

Banking related market risk is contained within the Group's two major treasury operations at the Bank and the Building Society. The interest rate risk profile is assessed regularly based on the fundamental trends in interest rates, economic developments and technical analysis.

##### Market risk from investments

This is managed in accordance with their purpose and strategic benefit rather than on market considerations and periodic reviews and reassessments are undertaken.

##### Foreign exchange risk

Foreign exchange risk is the potential adverse impact on earnings and economic value due to currency rate movements. This involves settlement risk which arises when the Group or one of its entities incurs a financial loss due to foreign exchange positions taken in both the trading and banking books. The potential for loss arises from translation exposure, transaction exposure and economic exposure. This risk is largely concentrated at the Bank, Society and Reinsurance Company.

##### Framework and governance

The Board of Directors is ultimately accountable and approves the market risk appetite for all types of market risk. The Board delegated the effective management of market risk to the entities' Asset Liability Committees (ALCO) for the banking entities and Risk and Compliance Committees for non-banking entities. On a day-to-day basis, market risk exposures are independently reviewed and measured by the Group Risk Management function, and appropriate management reports are generated. A comprehensive framework of limits to control market risk including foreign exchange risk exposures is in place for the different levels of reporting.

##### Market risk measurement

The tools for measuring market risk that are applied within the Group range from the very fundamental and basic marking-to-market, to the more sophisticated Value at Risk Models. Generally, measurement tools in use at any point in time are commensurate with the scale, complexity, and nature of trading activities and positions held by entity. The tools and techniques used to measure and control market risk include the repricing gap, scenario analysis on net interest income and economic value of equity, stop loss limits, duration analysis, stress testing and Value at Risk. In addition, the Group also performs ratio analysis on the key ratios of each entity. Risk limits for all the measures are documented in each entity's ALCO policy. Group Risk Management performs regular reviews of the existing models to ensure that they are still relevant and behaving within expectations.

#### 30.6 Operational risk

Operational risk is the risk of loss arising from the potential that inadequate information system, technology failures, breaches in internal controls, fraud, unforeseen catastrophes, or other operational problems may result in unexpected losses. Operational risk exists in all products and business activities.

##### Group's approach to managing operational risk

The Group's approach is that business activities are undertaken in accordance with fundamental control principles of operational risk identification, clear documentation of control procedures, segregation of duties, authorization, close monitoring of risk limits, monitoring of assets use, reconciliation of transactions and compliance.

##### Operational risk framework and governance

The Board has ultimate responsibility for ensuring effective management of operational risk. This function is implemented through the Board Risk and Compliance Committee at Group level which meets on a quarterly basis to review all other major risks including operational risks. This Committee serves as the oversight body in the application of the Group's operational risk management framework, including business continuity management. Each entity has a Management and Board Risk and Compliance Committee to ensure a robust operational risk management framework. Other Group management committees which report to Group Executive Committee include the Group New Product Committee, Group IT Steering Committee and Group Business Continuity Committee.

##### The management and measurement of operational risk

The Group identifies and assesses operational risk inherent in all material products, activities, processes and systems. It ensures that before new products, activities, processes and systems are introduced or undertaken, the operational risk inherent in them is subjected to adequate assessment by the appropriate risk committees which include the Risk and Compliance Committee and Group New Product Committee.

The Group conducts Operational Risk Assessments in line with the Group's risk strategy. These assessments cover causes and events that have, or might result in losses, as well as monitor overall effectiveness of controls and whether prescribed controls are being followed or need correction. Key Risk Indicators (KRIs) which are statistical data relating to a business or operations unit are monitored on an ongoing basis. The Group also maintains a record of loss events that occur in the Group in line with Basel II requirements. These are used to measure the Group's exposure to the respective losses. Risk Limits are used to measure and monitor the Group's operational risk exposures. These include branch cash holding limits, teller transaction limits, transfer limits and write off limits which are approved by management and the Board. In addition, the Group also uses risk mitigation mechanisms such as insurance programmes to transfer risks. The Group maintains adequate insurance to cover key operational and other risks.

##### Business continuity management

To ensure that essential functions of the Group are able to continue in the event of adverse circumstances, the Group Business Continuity Plan is reviewed annually and approved by the Board. The Group Business Continuity Committee is responsible for ensuring that all units and branches conduct tests half yearly in line with the Group policy. The Group continues to conduct its business continuity tests in the second and fourth quarters of each year and all the processes are well documented.

#### 30.7 Compliance risk

Compliance risk is the current and prospective risk to earnings or capital arising from violations of, or non-conformance with laws, rules, regulations, prescribed practices, internal policies and procedures or ethical standards. The Compliance function assesses the conformity of codes of conduct, instructions, procedures and organizations in relation to the rules of integrity in financial services activities. These rules are those which arise from the institution's own integrity policy as well as those which are directly provided by its legal status and other legal and regulatory provisions applicable to the financial services sector.

Management is also accountable to the Board for designing, implementing and monitoring the process of compliance risk management and integrating it with the day to day activities of the Group.

## Unaudited Interim Results For the six months ended 30 June 2013

### Notes to the Financial Results (continued) For the six months ended 30 June 2013

#### 30.8 Statement of Compliance

The Group complied with the following statutes inter alia:-  
The Banking Act (Chapter 24:20) and Banking Regulations, Statutory Instrument 205 of 2000; Bank Use Promotion & Suppression of Money Laundering (Chapter 24:24); Exchange Control Act (Chapter 22:05); the National Payments Systems Act (Chapter 24:23) and the Companies Act (Chapter - 24:03).

In addition, the Group also complied with the Reserve Bank of Zimbabwe's directives on liquidity management, capital adequacy as well as prudential lending guidelines.

#### 31 INTERNATIONAL CREDIT RATINGS

The banking and reinsurance subsidiaries have their credit ratings reviewed annually by an international credit rating agency, Global Credit Rating. All subsidiaries have maintained their investor grade ratings as illustrated below.

Subsidiary	2013	2012	2011	2010	2009
FBC Bank Limited	A-	A-	A-	A-	A-
Reinsurance	A-	A-	A-	A-	A-
Building Society	BBB-	BBB-	BBB-	BBB-	BBB-

#### 32 CORPORATE GOVERNANCE

The Board is committed to the principles of openness, integrity and accountability. It recognises the developing nature of corporate governance and assesses its compliance with local and international generally accepted corporate governance practices on an ongoing basis through its various subcommittees.

The Board is responsible to the shareholders for setting the direction of the Group through the establishment of strategies, objectives and key policies. The Board monitors the implementation of these policies through a structured approach to reporting and accountability.

The Board meets regularly, with a minimum of four scheduled meetings annually. To assist the Board in the discharge of its responsibilities a number of committees have been established, of which the following are the most significant: (i) Board Audit Committee, (ii) Board Human Resources and Remuneration Committee, (iii) Board Finance and Strategy (iv) Board Risk Committee.

#### Value at Risk

Value at Risk is a statistical estimate of the maximum loss expected from the Bank's trading book with a given degree of confidence over a given holding period. The Bank's system uses the Exponentially Weighted Moving Average (EWMA) method to compile VaR. This method attaches more weighting to the most recent data on market risk factors- the weights decaying exponentially as we go further into the past. The VaR parameters used are a 95% confidence level, one day holding period and 5 day holding period.

Asset Class	Asset Class	Type of Risk	Present Value	Portfolio Weight	Value at Risk (95% Confidence level)	
					1-day Holding Period	5-day Holding Period
Currency	Currency	Exchange Rate	818 687	100%	11 707	26 178
Quoted Investments						
		Total	818 687	100%	11 707	26 178
		Portfolio VaR			11 707	26 178
